🧠 Mission

Grippy Sock Gang (\$GRIP) is a radically sincere memecoin for everyone who's ever been told to "get a grip" while crawling through the chaos of mental illness, chronic conditions, or addiction.

We're turning meme culture into mutual care—funding **mutual aid** and **mental health-focused art** using on-chain tools and the degenerately powerful force of community-driven liquidity.

This isn't just a coin. It's a laugh through the tears.

A yellow sock raised in solidarity.

A shitpost for the soul.

💥 What Is \$GRIP?

\$GRIP is a Solana-based memecoin launched on [Pump.fun](https://pump.fun)—a platform that enables **rug-proof, fair launches** with no hidden dev allocations.

No VC. No founder pre-buy. No strings attached.

Just **a memecoin with a mission**—built from the bottom up by a community of weirdos, warriors, and artists who've survived the system.

Tokenomics

Feature	Detail
Ticker	\$GRIP

Supply	1,000,000,000 (fixed)
Launchpad	Pump.fun
Creator Supply	0% — no premine, no airdrops
DEX Listing	Auto-listed after 10 SOL mcap
Website	grippysock.club

Public Treasury Vision

Once launched, \$GRIP will fund a **public treasury** supporting two major pillars:

-  **Direct Mutual Aid:** Microgrants for chronically ill, neurodivergent, and struggling community members
-  **Mental Health–Centered Art:** Grants for artists exploring survival, stigma, and healing

Target Revenue Split:

- **50% — Mutual Aid**
- **50% — Artist Support & Gallery Projects**

These funds come from **LP fee revenue and direct SOL donations**.

Transparency & Trust

Our approach is **radically transparent** from day one:

-  **0% dev supply**

-  **No pre-buy or early minting**
-  **Open public treasury wallet**
-  **All grant activity publicly logged**
-  **Optional locks using Streamflow for credibility**

A Quick Reality Check

Memecoins are chaotic. This is a volatile, high-risk space.

We can't promise profits—only purpose.

We're building this for the long haul, but please **invest responsibly**. The real value here is in community, solidarity, and mutual aid.

Liquidity Pool Strategy

\$GRIP auto-creates a liquidity pool once we hit ~10 SOL market cap on Pump.fun.

Since we don't have early funds to bootstrap this manually, we'll rely on **community contributions** of SOL to build additional LP, which will **generate revenue for the treasury via swap fees**.

Donation Allocation Plan:

- **70%** of SOL → Paired with \$GRIP to add LP
- **30%** of SOL → Optionally time-locked (e.g. via Streamflow), or reserved for initial grants

Anyone can also pair \$GRIP + SOL and add LP themselves.

Roadmap

Phase 0 — Setup & Community Building

- Publish white paper + website
- Launch social channels + treasury wallet

- Meme with radical sincerity
- Recruit contributors: devs, artists, organizers

Phase 1 — Token Launch

- Deploy \$GRIP on Pump.fun
- Reach 10 SOL market cap to trigger LP graduation
- Open treasury for community SOL donations
- Deploy initial LP manually using donated funds

Phase 2 — Activate Treasury

- Begin accruing LP revenue
- Launch **transparent dashboard** tracking all inflows/outflows
- Fund first **5–10 microgrants**
- Launch “**Grippy Grants**” art support program

Microgrant Process:

- Simple public application form
- Reviewed by a **community review squad** (volunteers with lived experience)
- Grants logged publicly with pseudonymous identifiers unless anonymity is requested

Phase 3 — Expand & Sustain

- Introduce **NFT impact logbook** (optional: recipient testimonies)
- Launch on-chain **mental health art gallery**
- Explore **community governance** via multisig or DAO
- Build partnerships with aligned aid orgs & creators

- Drop grippy sock IRL merch

How to Get Involved

There's no team. No corporate fund. Just us.

Help us meme something real into existence.

Ways to Help

-  Spread the word — meme, tweet, retweet, testify
-  Donate SOL to build the treasury & LP
-  Volunteer (review grants, design, code, write)
-  Submit art, share stories, and explore the gallery
-  Use grippysock.club as your anchor

Treasury Wallet

(Will update when ready)

All funds and activity will be viewable via Solscan

Final Words

\$GRIP isn't just about liquidity. It's about solidarity.

We're tired of being ignored. Mocked. Overlooked. Institutionalized.

We're using the tools of crypto to build something sincere, absurd, and necessary.

We don't need a seat at their table. **We'll mint our own table. In socks.**
